*Bringing out the best together*

**Tuesday, 24 March 2020**

On Thursday, 26 March Year 9 students will work from home as preparations for the possibility of transition to off-campus learning.

This will be our third test for off-campus learning. Last week some families from Year 1 and Year 5 trialled the Junior School's system whilst Year 10 students completed a successful work-from-home day. This preparatory work enables thorough testing of the technologies under real-life conditions, as much as possible. It also provides valuable feedback from the students and teachers about its effectiveness.

Our preference is that students do stay home on Thursday but if this is not possible, there will be a single Year 9 class based in the library all day and working on the same online lessons.

If you have any questions or concerns please contact Bob Simpson, Deputy Principal - Curriculum.
